Amino acid sequences of the parental P-92 peptide (amino acid positions 92-101 of MUC-1) and analogue peptides. Amino acids are shown by the single-letter code. Substitution amino acids are indicated in bold and italic.

^{*}Results are expressed in relative fluorescence values. HLA-A3 peptide (T2 binding=200) was used as a negative control and CAP1-6D (T2 binding=875) was used as a positive control.
